

Validation study of Wearable Technology for action recognition in a sport context

Presented by
Ana Cristina Rodrigues

September 2019

Topic Highlights

- Purpose
- Equipment
- Methodology
 - Data Collection
 - Processing
 - Architecture
 - Evaluation
- Conclusion

Purpose

Assess the feasibility
of a wearable device

03

Equipment

04

Methodology

Data Collection

Processing

Architecture

Evaluation

05

Data Collection

- 4 healthy males
- Simultaneously wore both systems
- Cycling, Stepping, Running and Strength exercises
- Filtering data to obtain 25 samples/second

06

Methodology

Data Collection

Processing

Architecture

Evaluation

07

Processing

Number of Data Samples for 1st Approach

Activities	Number of Samples
Running	264
Cycling	140
Stepping	57

Number of Data Samples for 2nd Approach

Activities	Number of Samples
Gluteo	18
Right Isokinetic	31
Left Isokinetic	32

08

Methodology

Data Collection

Processing

Architecture

Evaluation

09

Evaluation

MBody3 - 6 channels Confusion Matrix

	Corrida	Cycling	Stepping	
Corrida	75 54.3%	1 0.7%	0 0.0%	98.7% 1.3%
Cycling	0 0.0%	46 33.3%	0 0.0%	100% 0.0%
Stepping	1 0.7%	0 0.0%	15 10.9%	93.8% 6.3%
	98.7% 1.3%	97.9% 2.1%	100% 0.0%	98.6% 1.4%
	Corrida	Cycling	Stepping	

BioPlux - 6 channels Confusion Matrix

	Corrida	Cycling	Stepping	
Corrida	81 58.7%	0 0.0%	0 0.0%	100% 0.0%
Cycling	0 0.0%	44 31.9%	0 0.0%	100% 0.0%
Stepping	0 0.0%	0 0.0%	13 9.4%	100% 0.0%
	100% 0.0%	100% 0.0%	100% 0.0%	100% 0.0%
	Corrida	Cycling	Stepping	

Evaluation

MBody3-2channels Confusion Matrix

Output Class	Gluteo	6 25.0%	0 0.0%	0 0.0%	100% 0.0%
	Isocinticocto	0 0.0%	6 25.0%	3 12.5%	66.7% 33.3%
	Isocinticoesq	0 0.0%	2 8.3%	7 29.2%	77.8% 22.2%
		100% 0.0%	75.0% 25.0%	70.0% 30.0%	79.2% 20.8%
	Gluteo	Isocinticocto	Isocinticoesq		Target Class

BioPlux-2channels Confusion Matrix

Output Class	Gluteo	4 16.7%	0 0.0%	0 0.0%	100% 0.0%
	Isocinticocto	2 8.3%	7 29.2%	1 4.2%	70.0% 30.0%
	Isocinticoesq	0 0.0%	1 4.2%	9 37.5%	90.0% 10.0%
		66.7% 33.3%	87.5% 12.5%	90.0% 10.0%	83.3% 16.7%
	Gluteo	Isocinticocto	Isocinticoesq		Target Class

Conclusion

Assess the feasibility
of a wearable device

Combining LSTM
with this wearable
lead to a good
performance

Capable of
recognizing activities
using its EMG data

Thank you!
